# Concrete Patterning Supplies Ltd

---

Concrete Patterning Supplies Limited was formed in the late 1980's and has become one of the UK's largest companies to specialise in the manufacture and supply of materials for imprinted concrete. Over the years our products have helped hundreds of companies to fit thousands of driveways and patios.

We are proud to have longstanding relationships with customers across the UK and internationally. Most of our materials are manufactured by us in our state-of-the-art production plant, ensuring high quality, a wide choice and continuity is guaranteed.

Our research team are continually looking for innovative ways to develop and improve, so that we remain industry leaders. All our products conform to current industry regulations.

Whether your needs are colours, mats, tools, products, or simply some technical on or offsite advice from our team of experts, our experience is second to none.

Please enjoy browsing our brochure, and we are happy to help if you have any queries

# COLOUR SURFACE HARDENER

---

A significantly formulated dry shake designed for the colouring, hardening and finishing of concrete surfaces.

Easily applied during the floating stage of concrete laying, Creteprint colour hardeners help harden and increase the strength of concrete surfaces, they resist moisture penetration and make surfaces easier to clean as well as prolonging the lifespan of concrete surfaces.

Available in a wide range of colours. We are always expanding our range, please see below some popular options.

**Please note that these colours are a guide, and the look will vary on a concrete surface.**

---

# RELEASE AGENTS

---

Creteprint Antique Release Agent is a dry powder used to ease the removal of concrete stamps, texturing skins and tools from the freshly placed concrete or cementitious materials used for imprinting. It has excellent adhesion to concrete surfaces and provides a moisture barrier.

Available in a range of colours, it is easy to apply and can be used to provide a stunning two-tone antiquing effect or same colour depending on personal preference. Each 10kg container will cover approximately 60-70sqm.

Creteprint Liquid Release Agent is used to ease the removal of concrete imprinting stamps, texturing skins and tools from the freshly placed concrete or cementitious materials used to imprint.

It is easy to apply and through spraying Liquid Release onto the concrete surface, mats and tools, it provides easy release with no sticking and prolongs the curing time of concrete. Colour pigmentation can be added to provide two-tone effect. Each 25ltr container will cover between 100 - 150sqm depending on method of application.

Other products we supply include wall gel for protecting walls and other surfaces from products, and acid wash to remove left over residue from the imprinting process.

---

# IMPRINTED CONCRETE SEALING

---

We are proud to offer a wide range of high quality sealers and revitalisers for imprinted concrete, along with preparatory products.

Our industry leading Lusterseal is available in Gloss and Matt finishes and is perfect for sealing and protecting newly laid concrete or for restoring and resealing older surfaces.

- Seals and protects from moss and weeds
- Enhances the colour of the surface and can have colour pigment added
- Keeps concrete surfaces looking new
- Provides protection from the weather like sun fading and freeze thaw
- Reduces the risk of damage or cracks
- Resistant to chemicals, stains and petrol

Our specially formulated Crete-Grip anti-slip can be easily added to our sealers. CreteGrip is environmentally friendly and contains finely ground polymer beads which when mixed with Lusterseal enhances grip and provides a safe and slip-resistant surface without affecting appearance. Perfect for sloping driveways, children's play areas or any surface that's prone to slipping.

---

# WASHING AND PREPARATION

---

Preparing the surface correctly is essential to maximising results. Our range of agents, preparation products and cleaning products ensures a high quality finish, achieved with ease.

Creteprint PreWash is used for cleaning surfaces prior to sealing. It removes excess release agent without leaving any harmful residue, as well as removing dirt and grease that can affect the sealant. It's also great as a standalone product for freshening up surfaces in between resealing them.

Creteprint Moss Clear concentrate is used for the easy removal of moss, algae, mould and dirt on hard surfaces. It can be diluted with water, applied with a garden sprayer and left to work. It is particularly effective to use on concrete, block paving and slabs as well as roof tiles, walls and facias. It can also be used in conjunction with our Crete-Clean foaming surfactant which increases surface retention time particularly on sloping or vertical surfaces.

Our Creteprint Standard Thinners consist of reclaimed solvents and is used for the easy stripping of Creteprint Lusterseal for repairs and resealing. It can also clean tools and materials.

We also stock PostFix concrete, specifically designed for securing concrete, timber, metal and plastic posts into any surface.

Our easy to use crack repair kits are perfect for repairing minor cracks and chips in concrete.

# THE RIGHT TOOLS FOR THE JOB

We supply for sale and hire a vast range of tools and equipment. We are continually expanding and updating our range, below are some of what we supply.

Printing Polythene

Rubber Squeegee

Concrete Placer

Stomper

Magnesium Hand Float

36" Double Roller Tamper and Roller Trays

Touch Up Wheel 3mm/6mm

22" Funny Trowel with Swivel

Large and Small Aluminium Poles

Blue Steel Pool Trowel 16"/18"/20"/22"/24"

Concrete Rake

Wheelbarrow

Kneel Board

Fluted Rubbing Brick

S Jointer

Adjustable Rock-It Bracket and Rock-It Adapter

Magnesium Bull Float 36"/48"

Chaplin Pressure Washer + kits/hose/lance/nozzle

T-Bar plus Hand Tools and Textured Roller

Big O Blue Fresno

8" Starter Connector

G Tool

8" Roller Tamper

Screeder 7ft/10ft

Chalk Lines and Pegs

Edging Trowel, Double Handled Trowel and Walking Edger

Blue Steel Fresno plus Brush Attachment

Brushes and Brooms

Walking Tamper

Bronco Bracket

# DRAINAGE

---

Installing the correct drainage solutions is essential to the success of any project.

We have an extensive drainage range from recessed manhole covers to channel drains suitable for both foot and road traffic providing discrete drainage coming in a range of designs.

Whether your project is domestic or commercial, we have something for all drainage requirements.

Our ACO drainage options are perfect for a range of applications.

- Available in both plastic and metal
- Channels interlock and clip together for quick and easy on-site installation
- Increased grip due to the grating surface
- Lightweight and easy to handle
- Profile improves speed of water and promotes self cleansing

Our drainage solutions include:

- Recessed manhole covers
- Specialist inset manhole covers
- Gulley pot
- Gulley raisers
- Polydrain channel corner
- Resin ACO rain drain
- Polydrain channel
- ACO channel hexdrain
- Deck O Drain

---

# TARMAC AND BLOCK PAVING

---

Our Creteprint Tarmac Revitaliser and Sealer is safe and easy to use for any Tarmac or asphalt surface. It can also be used for indoor applications such as garage floors.

- Seals and protects the surface
- Prolongs the lifespan of the surface and gives a restored, freshly laid look
- Has excellent coverage
- Available in a range of colours

For other surfaces including block paving and stone our Aquaseal can be used. Creteprint Aquaseal is a water based acrylic sealer which leaves a lovely low sheen finish. It is fume free and environmentally friendly.

- Can be used on concrete, block paving and natural/Indian sandstone
- Seals, restores and protects
- Easy to use with excellent coverage
- Durable and hard wearing
- Can be used indoors as well as outdoors

---

# ROCKBOND

Rockbond is our resin bound system combining a two part polyurethane resin with dried natural aggregate to produce a beautiful natural looking surface requiring low maintenance. We supply an extensive range of dried aggregates and resins as well as mixers and hand tools.

Rockbond is a high-quality aggregate resin bound system, that is fast curing, non-hazardous and durable. It is resistant to various acids, petrol and diesel.

Our Rockbond UVR Resin Kit is a high-strength system that is SUDS compliant. Our UVR Resin Kit is resistant to colour change from exposure to UV.

We supply a wide range of aggregate blends and this system is ideal for driveways, patios, paths, swimming pool areas and any SUDS area.

The Baron E120 Forced Action Mixer is ideal for installing resin bound systems due to the robust and efficient nature of the machine which also has an excellent product life. It is easily transported and loaded with large rollers and is easy to clean and maintain. It has a robust frame construction with an effective mixer arm / shovel construction and is self-emptying. The lid cannot unintentionally close due to a positioning bolt and reliable and precise safety switch on the lid. It has exchangeable mixer blades and a large 2.0 kW powerful maintenance-free motor. Available to purchase.

We also supply replacement parts.

We also supply cleaners for mixers and tools and resin cleaner and revitaliser.

Our Rockbond system comes in a wide variety of beautiful and bespoke blends. Please browse these on the pages that follow.

**Amber Gold**

**Black**

**Celtic Plum**

**Beige**

**Silver Granite**

**Green Granite**

**Red Granite**

**White Flint**

**Golden Quartz**

**Alpine**

**Arcadia**

**Arizona**
